Question **1**

Complete

Mark 1.00 out of
1.00

Your company currently has an Azure DevOps organization and an Azure subscription. They also have an on-premises data center. They have the current resources in place

- A set of ten virtual machines in Azure
- A set of ten virtual machines in their on-premises data center.

All of the virtual machines have the Azure Pipelines agent installed. You need to implement a release strategy for deploying the applications onto the virtual machines. Which of the following needs to be implemented for the application deployment onto the virtual machines in Azure?

Select one:

- ☒ a. A Deployment Group
- ☐ b. A Resource Group
- ☐ c. A Management Group
- ☐ d. Application Roles
